## About Me

Responsible frontend developer with mentoring experience. My focus is on creating engaging, accessible & performant interfaces for humans.

My experience includes the development of adaptive cross-browser applications, with a focus on reliability and performance. I try to see each project as a set of independent reusable components, such an implementation increases stability and facilitates refactoring.

Currently working on egambling with Angular and TypeScript. I do a lot of research to keep my skills up to date and expand my horizons.

I like projects with good structure and room for creativity.

## Skills

- HTML (njk/twig)
- CSS (scss/sass)
- JavaScript
- Angular
- React
- TypeScript
- UI/UX
- JAMstack
- A11y Accessibility
- npm
- Gulp/Webpack

- Teamwork
- Flexibility
- Professionalism
- Responsibility
- Critical thinking
- Problem solving
- Mentoring
- Learn on the fly

## Work Experience

02/2022 – PRESENT

### Frontend developer

[Brain Rocket](#) · Limassol, Cyprus

(remote from Valencia)

- Develop independent Angular components for B2B projects, teamwork in two-week sprints, code reviews, refactoring Email's markup.
- Optimized the performance of transitions, built a modular email layout system with njk template engine. Revealed the problem of gap in flexbox and performance of css filters.

07/2020 – 01/2022

### Fullstack web developer

[Ihor](#) · Moscow, Rus

- Development and support of websites for the services of the customer. Revision and update legacy projects, set up on cms WordPress, JAMstack (11ty) and integration with various services. Optimized page load speed according to GooglePageSpeed.
- Implemented kanban task management for the development team. Developed universal independent blocks - components for typical tasks.

01/2020 – PRESENT

### Mentor

[HTML academy](#) · Saint Petersburg, RII

[HTML Academy](#) · Saint Petersburg, RU

(remote)

- Mentor in HTML, CSS, JavaScript and email's markup intensives. Helping and motivating students, answering their questions, code-reviewing and pull requests approving.
- Regularly ranked among the top mentors based on student feedback and 10/10 grades received. Received a commendation for contribution to course development.

05/2019 – 06/2020

## • Front-End Developer

[PrestaWeb](#) · Ekaterinburg, RU

- Frontend development, markup approval from markup developers, integration with backend api and CMS PrestaShop. Legacy projects support, working with time logging, teleconferencing, teamwork.
- I have developed modern layouts using the fallback to support older browsers. Tweaked the usability of the corporate wiki, improved readability through typography.
